

AI Use Disclosure

Reza Kazmi

CIS 4374 - Homework 2

Smart Parking Platform

Tool Used: OpenAI ChatGPT

How AI Was Used:

I used ChatGPT to review the Homework 2 instructions and my previous homework. ChatGPT drafted the Work Breakdown Structure, proposed a 12 week development schedule, identified dependencies and milestones, and generated the Gantt chart. It also combined the new sections with Homework 1 in a Word document and drafted my stakeholder update video script.

Extent of Assistance:

AI assistance included substantial drafting, schedule estimates, chart creation, and document formatting. The proposed timeline is an initial estimate, not a verified development schedule.

My Contributions:

I provided the lecture slides and my Homework 1 document, directed how the new material should be added, and requested clearer wording for the video script.
