AI Use Disclosure

Reza Kazmi

CIS 4374 - Homework 6

Smart Parking Platform

Used: OpenAI ChatGPT

How AI Was Used:

I used ChatGPT to review my previous report against this week's assignment instructions and suggest updates. It helped draft user stories and completion criteria for the eight Sprint 1 tasks, identify wording and formatting errors, check budget calculations, and suggest changes to keep the requirements, schedule, and staffing plan consistent.

I also provided Jira screenshots so ChatGPT could help describe the current backlog and sprint status accurately. I made the changes in my document and reviewed the content before submission. The development tasks remain planned, and the report does not claim that the platform has been built or tested.
