

AI Use Disclosure

Reza Kazmi

CIS 4374 - Homework 4

Smart Parking Platform

Used: OpenAI ChatGPT

How AI Was Used:

I used ChatGPT to help interpret the assignment requirements and draft the new sections of my Smart Parking Platform report. This included suggesting 16 project risks, drafting a risk register with 10 entries, and creating a proposed communication plan. ChatGPT also helped draft the script for my stakeholder update video.

The probability and impact ratings, team roles, and response strategies are proposed planning assumptions for the fictional project. They are not results from an implemented system. I am responsible for reviewing the AI content and ensuring that my submission meets the assignment requirements.
