

AI Use Disclosure

Reza Kazmi

CIS 4374 - Homework 1

Smart Parking Platform

Tool Used: OpenAI ChatGPT

How AI Was Used:

I used ChatGPT to help interpret the assignment instructions and draft the Homework 1 document. This included researching existing parking applications, comparing their features, drafting the Vision and Scope section, and developing initial requirements and use cases. I also asked ChatGPT to simplify the draft, so it was appropriate for the first homework.

Extent of Assistance:

ChatGPT generated substantial portions of the proposed wording and some use case descriptions. The assistance went beyond spelling, grammar, and formatting. The parking application research used the official websites of ParkMobile, SpotHero, and ParkWhiz.

My Contributions:

I provided the assignment instructions, project brief, and lecture slides. I directed revisions to the level of detail and organization and chose to prepare the final document using my own formatting.
